quality & service.

MANUFACTURERS OF CUSTOM PROFILE EXTRUSIONS

Exceptional Quality

We believe in providing the highest quality products from the highest quality materials. We offer you the advantages of over two decades of experience in all profile extrusion-related work.

In every step of the production process, we use advanced technology to ensure perfection through routine statistical process control studies. By guaranteeing accuracy and quality, we can provide you with a part that meets your expectations every time. We also offer secondary fabrication services such as notching, punching, precision cutting and rubber gasket welding so you can immediately implement your finished part into your production process, saving you time and labour costs.

Exceptional Service

We welcome the opportunity to meet your custom profile challenges and exceed your quality and service expectations.

Our specialized experience means that you can come to us with an idea or a concept, and we can develop it, design it, produce and fine-tune it to your precise requirements. In this way, we can meet both your short-term and long-term requirements.

Using the latest AutoCAD software and wire EDM Machine, we create custom profile extrusion products that satisfy any specifications, from the simple to the complex. Our services include cost estimates, pre-production samples, and on-site die creation, modification or repair.

When your product is ready, it's our priority to get it to you safely and on time. We offer a variety of shipping options to meet your needs, including in-province pick up, North America delivery, just-in-time delivery, and ship-to-stock.

We also offer booking orders, enabling your order to be produced and held in inventory until you're ready to have the product shipped.

Our experience...

extends to a wide variety of industries, including:

Automotive

Window and Door

Bus

Agricultural

Aero

Janitorial Supplies

Construction
